Jax Nurses Buy Houses is a home buying company that offers cash for houses of all types throughout the area. We buy houses from homeowners who want to sell, as well as investors who want to purchase properties and then rent them out. We don't just purchase homes, however — We even buy “hard to sell” houses that involve probate or inheritance, divorce, repairs or county liens with violations, problem tenants, unpaid or backed taxes, foreclosure, or short sales. We have been providing homeowners with the highest rate of return on their property investments for years. We specialize in helping individuals get rid of any unwanted properties quickly so they can move on with their lives. When you decide to sell your house to us instead of a traditional real estate agent or company, you have several distinct advantages and you should be satisfied as **we buy houses in Jacksonville**.
